MIDI Routes

Current Project: Split Keyboard - Drawbar Organ - Ignore 79 7B - change program - V8.bmp

Route Sets

[Select Route Set]

Routes

Automatic Routes (disabled because a MIDI Translator project is loaded)

active	SOURCE	DESTINATION	Del All
<input checked="" type="checkbox"/>	Bome Virtual Port 1	Bome Virtual Port 1	Del
<input checked="" type="checkbox"/>	My-Bitstream (BomeBox DIN)	My-Synths (BomeBox DIN)	Del
<input checked="" type="checkbox"/>	My-Organ (BomeBox DIN)	My-Synths (BomeBox DIN)	Del

Bome Network MIDI

Name	Status	
SHUTTLE 192.168.1.251	Connected	<input type="button" value="Disconnect"/>

Manual IPs

Here, you can add Network MIDI devices by IP address or host name. If found, the respective Network MIDI port will appear above for connection. This feature allows you to connect devices in a different subnet. It requires firmware version 1.1 or later.

[No Manual IPs]

MIDI Ports — by Name

Current Project: Split Keyboard - Drawbar Organ - Ignore 79 7B - change program - V8.bmp

By Name

By Device

MIDI Input

Name	Assignment	Status
<i>Bome Virtual Port 1</i>	(none - ignore) ▾	Pending (not assigned)
BomeBox DIN		Open (implicit)
<i>My-Bitstream</i>	BomeBox DIN ▾	Open
<i>My-Organ</i>	BomeBox DIN ▾	Open
<i>Network 1</i>	SHUTTLE (Auto Alias)	Closed
SHUTTLE		Closed

MIDI Output

Name	Assignment	Status
<i>Bome Virtual Port 1</i>	(none - ignore) ▾	Pending (not assigned)
BomeBox DIN		Open (implicit)
<i>My-Synths</i>	BomeBox DIN ▾	Open
<i>Network 1</i>	SHUTTLE (Auto Alias)	Closed
SHUTTLE		Closed

Project File Upload

Upload a project file (.bmtmp) here by selecting a file with the Browse button, then click the Upload button.

Project File: No file chosen

Available memory: 8.30 MB

USB Drive Support

You can run project files from (one) USB thumb drive. Files are searched up to one directory level. They appear in the list above.

Such project files will only run automatically when power cycling your BomeBox when the USB thumb drive is plugged in.

Some USB thumb drives are incompatible with the BomeBox. In that case, try another one.

General Settings

Name

Country (WiFi Regulation)

Set Password

New Password

Confirm

Reset password to serial number

Get password reset file

To reset the password, copy the reset file on a USB thumb drive, plug the thumb drive into the BomeBox, and power cycle (reboot) it.

Ethernet Settings

Ethernet Client

Default mode: this BomeBox uses a DHCP master in the Ethernet network.

Ethernet Master

This BomeBox is the DHCP master for all other Ethernet network devices (only one DHCP master allowed on a network).

Fixed IP Address

Advanced: this BomeBox uses a fixed IP address and netmask (use at your own risk).

IP Address

Netmask

Get network reset file: [Network Reset File](#)

To reset the network settings, copy the reset file on a USB thumb drive, plug the thumb drive into the BomeBox, and reboot it.

WiFi Settings

Disable WiFi *WiFi is currently enabled.*

Current WiFi Address: IP4: 192.168.1.50 (Mask: 255.255.255.0)

HotSpot

Default mode: other devices can connect to this BomeBox WiFi (provides an own DHCP).

Client

Connect to a WiFi router or a HotSpot.

SSID

Password

Passwords must be at least eight characters.

Available WiFi Networks:

Sunrise_2369974 75% - Security: WPA2 PSK (CCMP) - channel 6 - mode: Master - BSSID: 9C:24:72:D1:F3:8C	Select

FRITZ!Box 7490 34% - Security: WPA2 PSK (CCMP) - channel 1 - mode: Master - BSSID: 38:10:D5:0E:30:11	Select

Access Point

Like HotSpot, but connects WiFi clients to the Ethernet network and lets them use the Ethernet DHCP.

Backup

Click "Create Backup" to download a current backup file. This file can be used later with the Restore function below.

Backup:

Restore

Here you can restore a previously archived .bbox backup file.

First, select the file with the Browse button then click the Restore button.

Restore a Backup: No file chosen

Reset to Factory Defaults

To reset the BomeBox to its initial state, click "Perform Reset".

Reset to Factory Defaults:

To reset the BomeBox to Factory Defaults without accessing the web config, download the reset file with the button below, copy it on a USB thumb drive, plug the thumb drive into the BomeBox, power cycle it, and press the PAIR button when both PAIR and POWER LEDs are blinking.

Update BomeBox Firmware

You are running firmware 1.5.3 (2023-05-31 16:46).

If you're connected to the Internet, you can download the latest firmware here:

<https://www.bome.com/products/bomebox#downloads>

To update the firmware, select a BomeBox firmware file (*.bxfw) with the Browse button, then click Update.
